

# BETTER NETWORK CONTROL WITH GLOBAL SD-WAN

For healthcare providers, SD-WAN enhances network capabilities, improves reliability, workflow, and organizational efficiencies.

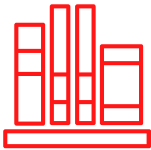

## UPTIME ASSURED

User uptime is critical to ensure 24/7 access to patient information, technology, and meeting compliance standards.

## BUILT-IN FAILOVER

Avoid outages with circuit failover happening automatically so user aren't disrupted and operations can continue efficiently.

## BETTER NETWORK CONTROL

Organizations can prioritize application traffic and support varying levels to maintain specific service levels.

## IMPROVED PERFORMANCE

Easily expand bandwidth with inexpensive broadband connectivity rather than expensive MPLS lines.

## CUT COST, GROW CAPACITY

Drastically reduce the time spent managing your IT infrastructure and deploying equipment with built-in SD-WAN management platforms.

## EXPAND PROGRAM OFFERINGS

Seamlessly support patients, visitors, and vendors while expanding programs with greater connectivity capacity.
